Relocation of Assignment and Certification Services Division

During the weekend of May 25, 1991, the Assignment and Certification Services Division moved to new facilities in the North Tower Buliding located at 2800 Crystal Drive. This move consolidates the assignment processing and certification processing functions in a single location. In addition, this modern facility better supports new automated data entry systems and high speed/high volume copiers used to fill public orders.

The new location offers a public service for direct access to knowledgeable staff who can assist members of the public with inquiries and service delivery problems. The counter is located in the 10th floor lobby of the North Tower Building and is open from 8:30 a.m. until 5:00 p.m. on PTO business days.

The Division can now accept correspondence relating to certification and assignment processing services and requests for certified copies of office records (with the exception of certified copies of assignments and trademark registrations) via fax. All fax requests for fee related services must be placed using a PTO deposit account. The fax telephone number for this Division is (703) 308-9759.

The new telephone and room numbers for this Division are as follows:

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
